— Workshop Overview

In a constantly evolving and unpredictable region and economic climate, developing and implementing a successful Business Continuity Management System (BCMS) can enable an organization to thrive regardless of the challenges and obstacles that may arise. This course is designed to help professionals protect their organizations by providing all the necessary knowledge for developing, implementing and/or enhancing a powerful Business Continuity Management System. This course also provides practical tools, systems, and reports that will enable participants to create their own customized Business Continuity Plan and more easily implement and manage them.

Why Attend

This course combines presentations as well as individual and team activities designed to establish a practical understanding of the elements of Business Continuity Management, enabling you to construct, deploy and validate relevant Business Continuity Management strategies/plans.

Who Should Attend

This course is ideal for anyone who is in, works with, or is training to be in any organizational planning role, or position such as; Business Continuity Managers, Incident Response teams, Chief Information Security Officer (CISO) or Chief Information Officer (CIO), or Operational Risk Managers.

— Learning Objectives

- Apply best practices in Business Continuity Management (BCM), including methodologies, tools, and approaches
- Enhance organizational capabilities and techniques within a Business Continuity team
