— Workshop Overview

Does Risk Management make any serious contribution to Business Performance? Do we really need to do it? Risk Management is the way the organisation balances the inevitability of risk in the pursuit of profit and objectives, with the need to protect its assets. By attending this Certificate in Risk Management & Business Performance training course, you will be able to prepare for and manage in circumstances where foreseen and/or unforeseen risks may be serious or even catastrophic. During the training course you will learn about the common shortfalls and inadequacies in the treatment of risk, as well as how to do it well. Risk management is often conducted poorly, but if applied coherently and rigorously, can contribute extensively to performance and competitiveness of operations, and the whole organisation.

Why Attend

This course uses instructor-led sessions, guided discussion, and practical exercises built around Day one: Introduction to Risk Management, Day two: Managing Risk to Maximise Performance, Day three: The Leadership Responsibility, and day four: business continuity.

Who Should Attend

Experienced Risk & Business Continuity Managers & Practitioners desiring a refresher on recent developments
Internal auditors and Compliance Managers who seek to fully understand Risk Management & ISO 31000
Team leaders, supervisors, section heads and managers
