— Workshop Overview

This course is designed to provide practical guidance to those involved in the management or administration of projects where the use of FIDIC forms of contracts is required. The course covers management disciplines and procedures in the “Pre-Contract” phase of the project including the FIDIC Client Consultant Service Agreement and selection of the appropriate FIDIC form of contract. It also covers the “Post Contract” award phase, including all contract management disciplines and claim management issues.

Why Attend

This course is highly interactive and includes group discussions, case studies and syndicate work. It also includes practical exercises that enable all participants to apply the advanced knowledge they gained and demonstrate their skills in managing FIDIC Contracts.

Who Should Attend

This course provides the necessary knowledge for professionals from government entities, private sector employers, consulting engineers, contractors, quantity surveyors, architects, legal advisers, funding agencies, insurers, and all professionals involved with FIDIC contracts

— Learning Objectives

- Apply the correct FIDIC form of contract that is best suited for each project
- Implement FIDIC's principles, mechanisms, and best practices for contract and project management
- Demonstrate the responsibilities, obligations, and entitlements of the employer and the contractor
- List the engineer's different roles, duties, and responsibilities in relation to FIDIC contracts
- Apply the correct payments, claims, and dispute resolution mechanisms as envisaged by the FIDIC contracts
