— Workshop Overview

Effective warehouse management is essential for improving service levels, controlling costs, maintaining inventory accuracy, and supporting supply chain performance. Modern warehouses must balance speed, efficiency, technology, and workforce productivity while adapting to changing customer demands. This course provides participants with practical tools to design warehouse strategies, optimize operations, manage inventory, and implement world-class performance systems.

Why Attend

This course uses an interactive and practical approach through presentations, case studies, warehouse process mapping, group discussions, KPI workshops, practical exercises, and real workplace examples.

Who Should Attend

Warehouse Managers
Logistics Supervisors
Supply Chain Professionals
Inventory Controllers
Operations Managers
Distribution Center Staff
Anyone involved in warehouse operations and

— Learning Objectives

- Develop effective warehouse strategies and infrastructure plans
- Improve warehouse layout, flow, and operating efficiency
- Strengthen inventory control and accuracy
- Apply Lean and continuous improvement principles
- Optimize people, technology, and outsourced resources
- Build supplier collaboration and value chain integration
- Measure warehouse performance using KPIs
- Create improvement plans for world-class warehouse operations

Course Outline

DAY
1

Warehouse Infrastructure Strategies

- Warehouse location strategy
- Options in warehouse layout and design
- Classes of warehouses
- Warehouse automation
- Information Technology (IT) in the warehouse
- Industry variations

DAY
2

Warehouse Operating Processes and Principles

- Key functional processes from receiving to picking and shipping
- Optimizing the flow of goods across processes
- Advanced processes: break-bulk, cross-docking, mixing, assembly
- Cycle counting and conducting a physical inventory audit
- Implementing Lean principles in the warehouse
- Continuous improvement and managing change

DAY
3

Inventory, Analysis, and Product Classification

- Function of inventory
- Inventory accuracy and control
- Handling WIP (Work-In-Progress) inventory
- Three-dimensional inventory classification and segmentation (ABC)
- Using inventory classification to drive efficiency
- Replenishment methods and strategies

DAY
4

Leveraging Your Resources and Developing New Capabilities

- Managing and incentivizing your people
- Employee training and evaluation
- The IT environment: your enterprise and the warehouse
- Role of the warehouse in the value chain
- Outsourcing: risks and opportunities
- Supplier collaboration models and strategies

DAY
5

Create a World-Class Warehouse with Performance Management and Metrics

- Contemporary trends in warehousing
- Warehouse best practices and benchmarking
- Role of performance management in the warehouse
- What should you measure?
- Establishing an executive dashboard using KPIs
- Identifying, prioritizing, and implementing improvements

— Upcoming Classroom Dates

DATE	LOCATION	FEE
